11.30 A.M. 19 AUGUST 1994

## **ECONOMIC INDICATORS, QUEENSLAND, AUGUST 1994**

### **MAIN FEATURES**

- Key indicators of economic activity in Queensland signal a continuation of growth in most sectors. Figures are considerably stronger than the corresponding period one year ago with demand for credit, trend estimate new motor vehicle registrations, retail trade, construction and employment all increasing significantly.
- The all groups Brisbane Consumer Price Index (CPI) increased 0.6% from March quarter 1994 to June quarter 1994, resulting in an annual increase (June quarter 1993 on June quarter 1994) of 1.6%. Contributing most to this annual increase was recreation and education (up 4.6%). All other components of the CPI contributed to the annual increase except clothing (down 1.9%).
- Queensland labour market indicators continue to show signs of improvement with a continuing steady decline in unemployment rates. The July 1994 trend estimate of the unemployment rate for Queensland was 9.1%, down from 9.2% in June 1994. This compared to the Australian trend estimate of the unemployment rate of 9.7% for July 1994. Persons employed in Queensland, in trend estimate terms, continued to grow steadily and increased by 4,300 persons to 1.43 million persons over the period June 1994 to July 1994.
- The trend estimate for total dwelling unit approvals in Queensland recorded their fifth consecutive monthly increase with an increase of 2.4% from May 1994 to June 1994, and an increase of 9.1% for the 12 months ending June 1994. Both new houses and new other residential buildings contributed to this growth, with the latter growing more strongly over the 12 months ending June 1994.
- Demand for credit in Queensland is continuing to remain strong. In the twelve months from May 1993 to May 1994 total housing finance for owner occupation increased 35.0%. Over the same period, personal finance commitments increased 24.9% and commercial and lease finance commitments increased 34.8% and 50.2%, respectively.
- The trend estimate for new motor vehicle registrations in Queensland increased 1.0% from May 1994 to June 1994 and 13.3% over the year ended June 1994. This was largely due to the strong increase in registrations of commercial vehicles. The June 1994 figure of 10,258 new motor vehicle registrations was the highest trend estimate since the beginning of the series in January 1960.
- The latest national business expectations survey shows that over the September quarter 1994, businesses are expecting to raise their prices by 0.4%, increase capital expenditure by 2.5%, increase sales by 1.9% and full time employment is expected to decrease by 0.1%.

Statistics shown in this publication are the latest available at the date of preparation. In a number of cases, figures appearing in this summary are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue, or to the statistical publication on the specific subject when figures are not shown.

Current publications produced by the Australian Bureau of Statistics (ABS) are listed in the *Catalogue of*

*Publications and Products* (1101.0). The ABS also issues the *Publications Advice* (1105.0) on Tuesdays and Fridays which lists publications to be released in the next few days. Both the *Catalogue* and the *Publications Advice* are available from any ABS office.

For detailed explanatory notes and definitions for the items shown in this publication, readers are referred to the specific publications which are listed in this issue.
